

## BRACKETT 108398 HOT MELT ADHESIVE THERMOMETER

**PRODUCT TYPE:** Industrial grade, high quality digital instant read thermometer.

**APPLICATIONS:** Good quality padding, using any hot melt adhesive, is very dependent on the application temperature of the adhesive. Hot melt glue pots develop cool spots, temperature probes get corroded, etc. This unit is designed to take temperature readings right at the application point, assuring the correct temperature.

**FEATURES:** The Brackett 108398 digital thermometer features a unique dot matrix 3/8" digit height display with animations for:

- On/off
- °F or °C change
- Hold

This digital thermometer is wrapped in a stainless steel case with silicone accents. It also features:

- Temperature range: -58° to 446°F (-50° to 230°C)
- Resolution: 0.1°F or °C full range
- Auto Shut-off feature
- One year manufacturer's warranty
