## BACKGLUE MACHINE

### General description:

A high-speed automatic feed machine.... highly productive for gluing and stripping of juvenile books, encyclopedias or comparable editions in great volume. Can also be used for *either* gluing or stripping exclusively.

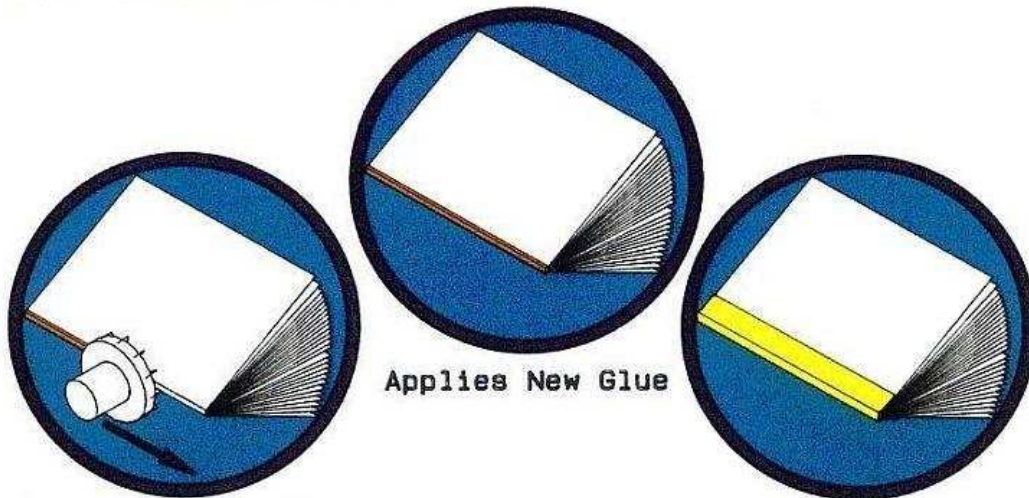

### Standard:

Applies cold glue to spine of book block. Applies cold glue to tape and then applies tape to the spine of book. The knife automatically cuts the tape to separate the book blocks. Chain Lug Infeed automatically feeds sewn books from a stack.

### Grinding option:

Used to grind off old glue from paper back books. Fans loose sheets and applies cold glue to fanned spine, applies cold glue to tape then applies tape to spine of book. Knife automatically cuts the tape to separate the book blocks. Choose the type of In-feed option you require.

## Backglue Operation

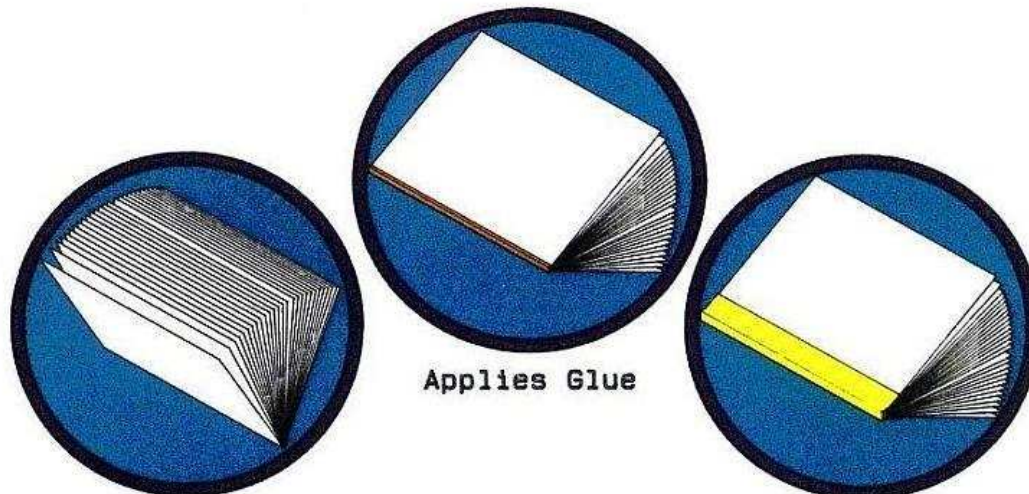

Grinds off Old Glue

Applies New Glue

Rebinds With Tape

Backglue with Grinder  
(Rebinder)

Book of Sewn  
Signatures

Applies Glue

Reinforces With Tape

Backglue
