

You're just a Paddy Wagon away from producing professional padding in your own shop. It's clean. It's simple. Best of all, it's a customer pleasing service...and highly profitable.

Your portable Paddy Wagon rolls to wherever you want to pad... then out of the way when you're done. All of your supplies fit on handy shelving, which does double duty to catch any excess padding compound, easily removed with your slicing knife.

Paddy Wagon offers you generous capacity: 15,000 8-1/2" x 11" (A4 75g/m²) sheets of 20# bond, even more for small sheets. Welded tubular steel construction plus heavy-duty noiseless casters promise a long and profitable production performance.

You can discard all the unsightly bricks, boards and racks. Patented Paddy Wagon restores the fun to professional padding. It's easy to learn, fast and nearly foolproof. A great fill-in job for just about anyone in the shop.

Paddy Wagon[®]

Padding Press

Professional Padding

It's easy as T.L.C.*

*Tilt

With Paddy Wagon's double doors locked, you tilt the table back. A 30-degree slant allows gravity to help align paper sheets and keep them square.

*Load

You load up all the sheets (along with chipboard stiffeners) to be padded.

*Clamp

You place the bar on top of your paper, slide down the self-locking quick release clamps to the bar and tighten the screws.

Ready to pad

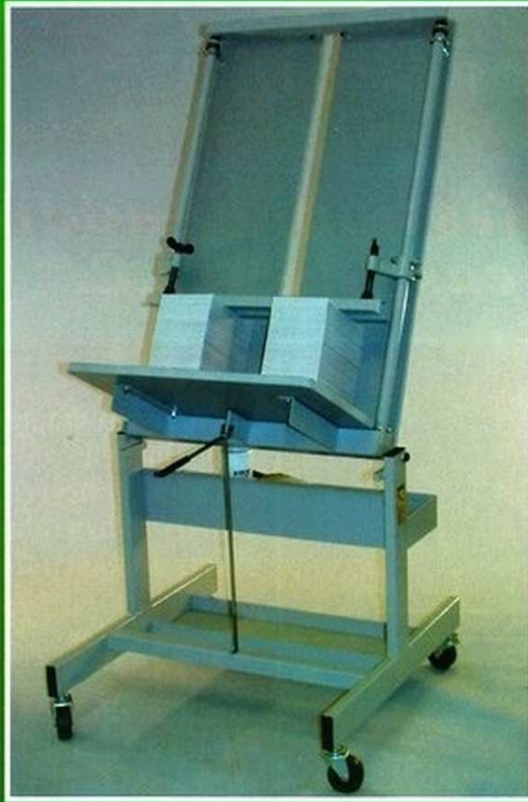

Bring Paddy Wagon back to upright position and open doors for complete access. Brush on padding compound and allow to dry before slicing into individual pads with a special slicing knife.
