

BRACKETT is proud to be your North American distributor of **SWIGRAPH** binding equipment.

The E40 Electric Punch by SWIGRAPH

A high performance, heavy duty, power punch for spiral style binding applications, this table-top unit can punch approximately 10,000 sheets per hour at widths up to 16 ½ inches. Changeable dies produce holes of various sizes and shapes for spiral binding, double loop, plastic binding etc. Tempered steel dies can be sharpened to maintain a quality product. A positive stop makes set-up a breeze.

Foot pedal activation allows the operator both hands free to handle materials. The E40 has a safety switch that lets the operator safely clear any jam-ups. A built-in drawer with a sight glass collects the confetti for neat, easy disposal and the quiet, smooth operation makes this machine a pleasure to use.

To see a brief demo of the E-40 in action visit our videos page on the web.
