

BRACKETT is proud to be your North American distributor of **SWIGRAPH** binding equipment.

*The **SNAPPY** by **SWIGRAPH***

is an electronic cutter for double-loop spiral style binding applications.

The standard model handles material diameters from 3/16" to 1" with 1-1/4" diameter available on request.

SNAPPY cuts all pitches:

3:1 ~ 2:1 ~ 9/16 ~ (or 4:1 by special order)

4:1"

3:1"

2:1"

The number of loops (from 3 to 99) is selected by the operator and the Snappy takes over from there. This tireless table-top worker is fully automatic – not even a foot pedal is needed. The Snappy delivers a precisely cut piece of coil – when that piece is removed, another one instantly takes its place.

A built-in digital counter displays the number of pieces produced for the current job.

To see a brief demo of the Snappy in action visit our videos page on the web.
